

Industrial
PACKAGING

About Us

Europe Packaging B.V. is a global packaging company with a major focus on manufacturing and supplying various packaging solutions to the industry and sustainable disposable packaging for different market segments in the food and non-food industry.

All industrial products are designed for customer's specifications and are produced with the highest standards and superior quality within a 7000 m² modern manufacturing facility.

Our disposable packaging is produced with sensitive care for the environment and sustainability as well as for recycling. We are part of the community that helps the world to become a better and cleaner place.

To provide a better and more environmentally friendly service for Western European countries, we established Europe Packaging B.V. in a new branch in Amsterdam, Netherlands.

Our dedicated team is now closer to customers and the market and is ready to facilitate your business needs. Our web-shop is also prepared for direct contact and meets your requirements as quickly as possible, yet the personal connection is also an essential part of our business.

About Us

Our Stakeholders

With the industrial packaging products, we have cardboard items with a specialty for corrugated boxes used in the automotive and logistic industry.

The aviation industry - together with a range of shipping boxes - is also a part of our portfolio. Our disposable packaging products are mainly available for the area of food and non-food. However, household and personal care are also part of our focus.

Markets segments as HORECA, retail, events, catering, fruits & vegetables can use the products we mostly sell out of stock from our warehouse in Amsterdam.

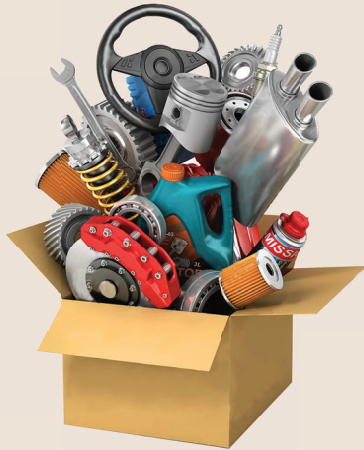

Values We Have

A major principal value at Europe Packaging B.V. is to work on an ethical base with respect for people, products, and origin.

We strongly support creating an open and honest relationship with all customers, suppliers, and employees, regardless of their race, religion, or color. We will also meet our markets to deliver ultimate quality products and services and use only qualified material that helps us part in our earth's sustainability.

We strive to ensure that market demands are met and that we are committed to offering the ultimate quality products and services to all customers.

Europe Packaging is specialized in providing a full range of solutions for the automotive spare part industry.

We manufacture a wide range of packaging products comprises of OEM (Original equipment manufacturers), OES (Original equipment suppliers), and IAM (Independent Aftermarket) companies.

The key advantages for the automotive spare part industry are professional design and print as well as short supply chain, which starts from the first contact to packaging delivery.

Tuck End Box

Reverse Tuck End (RTE) Box:

- Easy assembly
- Can be stored in flat position (empty)
- Cost effective for packaging operation (reducing waste and set-up fees)
- Used for lighter weight products
- Easy to load your product inside

Straight Tuck End (STE) Box:

- Easy assembly
- No white raw edges visible on the front
- Can be stored in flat position (empty)
- Cost effective for packaging operation (reducing waste and set-up fees)
- Used for lighter weight products

Tuck Top Auto Bottom Box

- Auto bottom closure
- Used for heavier products because of bottom closure
- Fastest assembly & loading
- Can be stored in flat position (empty)
- Rigid shape with nice and flat bottom

Five Panel Hanger

- Additional double-layered display panel extends vertically from back panel
- Hanging feature is applied by punch hole on both layers
- Can be displayed in any location when placed on hooks or used with clip strips
- Ideal option for light products as retail packaging

Roll End Tuck Front Box

- Product contents easily seen and readily accessible
- Best type of retail packaging
- Resistant to crush more than any type of box
- Shelf life is longer because of less deformation

Slotted Box

- Provides transportation advantage
- Used for heavy and large products
- Requires staples or tape to secure the top and bottom
- Easy assembly
- Can be stored in flat position (empty)
- Longer shelf life

Tuck Top Snap- Lock Bottom Box

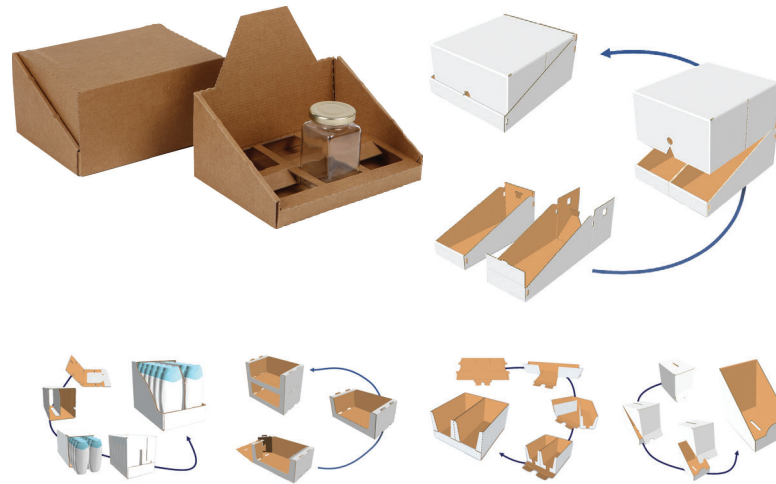

- Used for heavier products because of bottom closure
- Most commonly used packaging type
- Easy assembly and fast loading
- Can be stored in flat position (empty)
- Rigid shape with nice and flat bottom

Food & Beverage is one of the largest sectors, and its packaging needs more attention.

- Advantages Easy transport to the point of consumption for end customers
- Retailer friendly
- Practical solutions for supply chain requirements
- Suitable for packaging lines
- Total packaging cost advantages
- 100% recyclable

Your product packaging is the first physical contact with your customer. The expectations from internet purchased products are increasing. Before, it was just packaging, but today your packaging is one of the most important things to strengthen the brand identity.

Damaged products because of a broken or low-quality packaging send a lousy message while a premium packaging increases your brand identification and improves customer satisfaction.

Europe Packaging has several sustainable solutions for e-commerce and logistics packaging.

e-Commerce

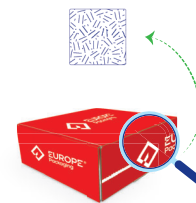

- Ideal surface for promotional print
- Designed according to customer needs and packaging lines
- Resistant to the shipping process
- Product-specific ventilation holes
- High storage capacity and stacking strength
- Easy transportation and display
- Storage space and transport cost saving
- Practical solutions for supply chain requirements
- 100% recyclable

1. Security Patterns

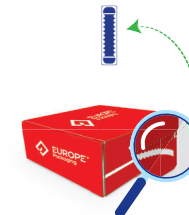

2. Hidden Texture

3. QR (Quick Response) Code

4. Self-Seal Locking

Self-Seal Secured Boxes

Europe Packaging offers a new technology called "Self-Seal Secured" to ensure the quality and safety of your products before reaching to your customers. With this technology, you can have traceability of your product through all the information within the packaging of the product and ensure product security.

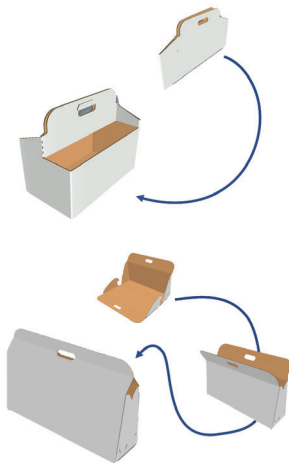

Security Patterns; Hologram with UV ink on packaging (security patterns), which can be seen under UV light, provides a way to help prevent packaging replication and ensure packaging authenticity.

E-commerce and Logistics

Shipping & Pallet Boxes

Europe Packaging produces heavy-duty Pallet Boxes to fit standard 1200 x 1000 or 1200 x 800 "Euro Pallets." Are suitable for weights of up to 1000 kilograms and above.

- Prevents damage during shipment because of its crushing resistance.
- Provides quick and easy loading.
- Can be preferred as plain or printed version.

Logistics Packaging

- Ideal surface for promotional print
- Designed according to customer needs and packaging lines
- Resistant to the shipping process
- Product-specific ventilation holes
- High storage capacity and stacking strength
- Easy transportation and display
- Storage space and transport cost saving
- Practical solutions for supply chain requirements
- 100% recyclable

Personal Care

Quality products deserve quality packaging. At Europe Packaging, we provide creative cosmetic packaging ideas to present and protect your products, capturing the consumer online and on the shelf. We offer customized solutions to your product, and your business needs from scratch.

Europe Packaging's personal care packaging solution includes cosmetic products packaging, luxury beauty products packaging, pharma, and medical products packaging.

We know that personal care packaging needs more attention. We offer free graphic design with no die-cut line or plate charges for our personal care customers, and before the order, they receive a free witness sample to be sure of their packaging box quality

Labels and Duct Tapes

Labels

Make your products stand out with the help of Labeling Services of Europe Packaging. Self-adhesive labels are indispensable elements in automotive industry. Labels must cope with harsh chemical environments and should have high temperature and chemical resistance.

For such kind of special applications usually PET /PE films and engineered adhesives preferred.

Europe Packaging has also special labeling solutions for tires and lubricant/oil can. For oil cans adhesives perform well in the hot filling processes. Europe Packaging combines best print quality with the best material. So that consumers can reach effective result easily.

All labels are available in cut-to-size and roll form and can be produced with holograms.

Duct Tapes

Europe Packaging offers Clear, Brown and Custom Printed Polypropylene duct tapes.

Polypropylene (PP), also known as Polypropylene, is a thermoplastic polymer used in a wide variety of applications including packaging tapes. These tapes are available in 3 grades of adhesive: solvent (solvent rubber), acrylic and hot melt.

- Solvent (solvent rubber): Most universal type with excellent resistant against high and low temperatures
- Acrylic: Ecological and ideal for long-term storage
- Hot melt: Easy rolling and resistant to room temperature.

VCI Papers and Bags

Europe Packaging is offering one of the most innovative corrosion protection technologies in the metalworking industry, VCI (Volatile corrosion inhibitor) Papers and Bags. They slowly release chemical compounds within a sealed airspace that actively prevents surface corrosion without applying any protective oils and liquids to your product. Protection of metal parts inside bags and boxes is a typical application for VCI papers and bags.

Our VCI Papers and bags are available in a wide range of options to help meet your needs such as flat sheet, rolls, cut sheets according to size preference with various weights and customized prints.

Advantages of VCI Papers

- Long-time protection of metal products
- Corrosion protection during shipment
- Approved by global leaders in the automotive industry
- To be environmentally friendly and cost-efficient
